

**Be Global,
Go Local!**

Lingohub is a Linz-based startup that enables faster and better localization of web and mobile applications. Driven by new developments in the software industry, the translation market is buzzing. With our technology, we serve software companies as well as translation agencies from all around the world.

We are looking for a

Part-time (15-20h) Backend Software Developer

in our office in Linz, Austria.

Requirements

- Excellent knowledge in Java
- Excellent understanding of OO Design
- Experience with Spring framework and test frameworks (JUnit)
- Good knowledge of SQL and databases, preferably in PostgreSQL
- Good understanding of version control, preferably Git
- Ideally, you also have experience in how to efficiently process and analyze large amounts of data

We offer you a gross minimum salary of € 884,-- per month according to the collective agreement. However, we are willing to pay an increased amount depending on your professional work experience and qualifications.
